**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 19-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not provide support for the exclusion of reducing and oxidizing agents.

***Election/Restrictions***

2. Newly submitted claims 10-17 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: These claims are drawn to a priming cap and weapons system that was not originally claimed.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 10-17 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1755

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-6, 10, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Mei et al (5,167,736).

Mei discloses a primer composition comprising 0-25 % of tetrazene and 0-30 % calcium carbonate (marble) (col. 4).

5. Claims 1-6, 18-20, and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Hagel et al (2002/01792009).

Hagel et al discloses a primer composition comprising 5-70 % of potassium dinitrobenzofuroxan (para 0008 and 0009), 0-30 % tetrazene (para. 0012), and 0-20 % of calcium carbonate (marble) (para. 0015).

### ***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 7-9 and 21 rejected under 35 U.S.C. 103(a) as being unpatentable over Hagel (2002/01792009) as applied to claims 1-6, 18-20, and 22 above, and further in view of Fairburn (1,406,176)

The claimed amount of calcium carbonate (marble) is not disclosed in Hagel.

Fairburn teaches the use of up to 100 parts of calcium carbonate in a match composition.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the amount of calcium carbonate taught by Fairburn in the composition of Hagel since Fairburn suggests that this amount may be used in a primer and since Hagel discloses the use of calcium carbonate in the primer composition.

#### ***Response to Arguments***

8. Applicant's arguments have been fully considered but they are not persuasive. In response to applicant's arguments, the recitation "propellant charge" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Note that Hagel discloses the claimed amounts of 5-70 % of potassium dinitrobenzofuroxan, 0-30 % tetrazene, and 0-20 % of calcium carbonate (marble).

Note that the other components including oxidizer and reducing agent can be 0% and thus are not required.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
